

# Flagship 4 Integrated Community Based Disaster Risk Reduction

Part of the Nepal Risk Reduction Consortium

## Project Tracking Survey

# How well are communities in Nepal increasing their resiliency to disasters?

Complete the project tracking survey and help us find out

**10-15** minutes to complete the online survey!

Analysis will be available on the

Flagship 4 website  
[www.nrrc.org.np](http://www.nrrc.org.np)

One of Flagship 4's objectives is to **track how CBDRR projects being implemented in Nepal are contributing to the disaster resiliency** at the community level and more broadly, at the national level.

## WHY

The Flagship 4 project tracking system working group has designed a short survey to track this progress and provide an overall picture of CBDRR in Nepal, including how projects are achieving Flagship 4's minimum characteristics of a disaster resilient community.

## WHO

Any **implementing partner of a CBDRR project** or **project with a component of CBDRR** is encouraged to complete the online project survey. Project officers may be best positioned to complete this information.

## WHERE

[www.nrrc.org.np](http://www.nrrc.org.np)

**Printable versions are also available online** in both Nepali and English

## Results

**An in depth analysis of the survey results will provide information such as:**

- › Of the 9 minimum characteristics, which are most often being achieved
- › Highlight districts in need of CBDRR projects
- › Communities/VDCs have that have
  - › created disaster management plans
  - › been trained in first aid, light search and rescue, etc.
  - › been linked into an Early Warning System (EWS)
