

Update on Flagship 4: Community Based Disaster Risk Reduction

Part of the Nepal Risk Reduction Consortium

Update

- Minimum characteristics
 - 1 pagers in Nepali & English
 - Case study handbook to come
- 19 district consultations completed
- Project Tracking survey
- Updated Information Platform
 - Project database & mapping
 - Knowledge library
 - Project survey

Project tracking survey

Project Tracking Survey

How well are communities in Nepal increasing their resiliency to disasters?

Complete the project tracking survey and help us find out

10-15 minutes to complete the online survey!

Analysis will be available on the

Flagship 4
website

www.nrrc.org.np

One of Flagship 4's objectives is to **track how CBDRR projects being implemented in Nepal are contributing to the disaster resiliency** at the community level and more broadly, at the national level.

WHY

The Flagship 4 project tracking system working group has designed a short survey to track this progress and provide an overall picture of CBDRR in Nepal, including how projects are achieving Flagship 4's minimum characteristics of a disaster resilient community.

WHO

Any **implementing partner of a CBDRR project** or **project with a component of CBDRR** is encouraged to complete the online project survey. Project officers may be best positioned to complete this information.

Survey Results

An in depth analysis of the survey results will provide information like:

- which of the 9 minimum characteristics are most often being achieved
- highlight districts in need of CBDRR projects
- which communities / VDCs have
 - completed disaster management plans
 - been trained in 1st aid, light search and rescue, etc.
 - linked in to an early warning system

Minimum Characteristics

Organisational base at Village Development Committee (VDC) / ward and community level

Access to Disaster Risk Reduction (DRR) information

Multi-hazard risk and capacity assessments

Community preparedness / response teams

Disaster Risk Reduction / Management plan at Village Development Committee / municipality level

Disaster Risk Reduction (DRR) Funds

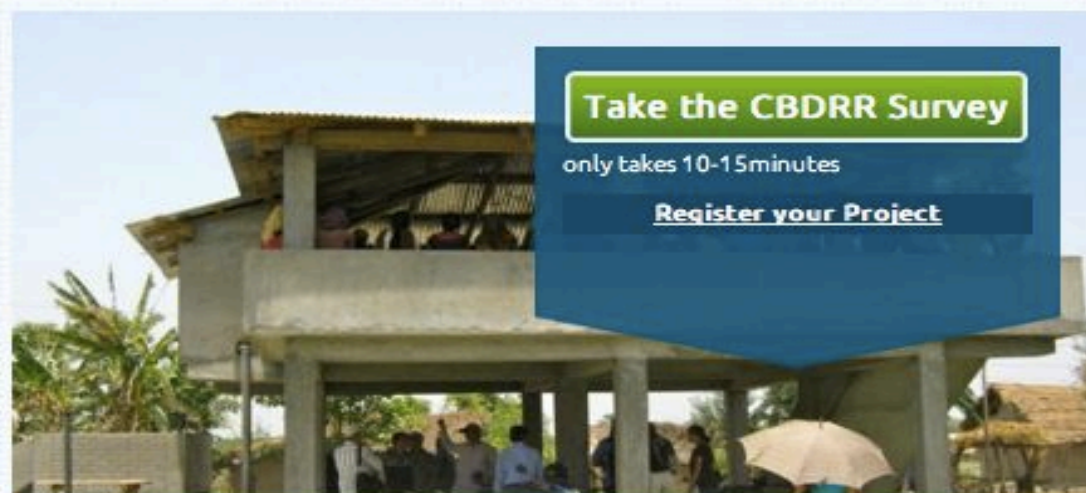

Access to community-managed resources

Local level risk / vulnerability reduction measures

Community based early warning systems

Take the CBDRR Survey

only takes 10-15 minutes

Disaster Risk Reduction / Management plan at Village Development Committee / municipality level

A plan at the local level which meets the Flagship 4 minimum requirements listed and is regularly updated, implemented and tested.

[Read more](#)

organisations contributing to CBDRR activities, to track progress against national targets and encourage greater investment for scaling up CBDRR across the country.

Flagship 4 does not itself implement any CBDRR projects nor have a budget for implementation but tracks funding allocated to CBDRR projects in Nepal and through advocacy and coordination between partners can facilitate the channelling of funds to where they are most needed.
