

Has your organisation completed the Project Tracking Survey?

As you know over the last few weeks we have been asking ALL organisations working in CBDRR to help us find out how well we are making communities in Nepal more disaster resilient, by filling in the online project tracking survey at www.nrrc.org.np

The final due date to complete the survey 5 October 2012. If you miss the deadline, your organisations efforts in CBDRR will, at a national level, unfortunately go unreported for 2012.

Thanks!

We would like to thank ADRA Nepal, Nepal Red Cross Society, Handicap International, Mercy Corp and UNDP for starting this process and entering in their project information.

How can your organisation complete the survey?

Those organisations who have not completed the survey, can go to the Flagship 4 website www.nrrc.org.np and complete the survey in 15 minutes.

Sign up for a clinic

In order to assist organisations in filling in the survey we will be holding several clinics that project officers or other relevant persons can attend.

3 separate clinics will be held in the coming weeks, each clinic will run for approximately 2 hours:

- 21 September (Friday) 10.00-12.00am
- 28 September (Friday) 10.00-12.00am
- 2 October (Tuesday) 10.00-12.00am

The person inputting the information only need attend one clinic.

Please send your nomination of preferred date, along with number and names of people from your organisation who would like to attend one of the clinics to flagship flagship4@nrrc.org.np

What information is relevant?

We are asking organisations to enter any CBDRR project completed, ongoing or planned since 2009.

Where will this information go?

This information will help us put together a picture of how Nepal is becoming more disaster resilient, what's working well and also outline where some of the gaps are. You as an organisation will also be able to export your results, against the 9 minimum characteristics and show to stakeholders how you are meeting the characteristics.

Note aggregated results from the survey will be published online, but will not specify the stakeholder they have originated from. An example of results includes the number disaster management plans created at VDC level.
